Quality commitments

- **Clean Label**

We rely on ingredients of 100% natural origin and we work daily to eliminate additives, preservatives, aromas and artificial colours.

- **GMO Free**

Our products are free of genetically modified organisms (GMOs).

- **Free of partially hydrogenated fats**

- We are pioneers in eliminating partially hydrogenated fats from all our products.

- **BIO Commitment**

We rely on organic farming, which dispenses with pesticides or chemical products that are not natural. We have the corresponding Organic Agriculture Certification for our BIO products.

- **Local flour**

We work hand in hand with local farmers and producers. We accompany the growth of each ear of wheat from planting, following the natural rhythm of the seasons, and we control the traceability of each grain until it's milled.

- **Salt reduction**

We join the NAOS Strategy for Nutrition, Physical Activity and Prevention of Childhood Obesity, of the Ministry of Health. We have NAOS Certification for our low sodium and potassium source breads

- **Quality ingredients**

Our butters are made with the best milk that contains premium quality cream, a natural source of vitamin A. Both butters and vegetable margarine are made free of total or partially hydrogenated fats, or added trans fatty acids, in order to take care of the health of our consumers.

- **Vegan and Gluten Free Products**

We have ranges of products that cover the special needs of groups such as celiacs, vegetarians or vegans.

- **UTZ sustainable cocoa**

The cocoa used for the outer layer of our Dots follows a rigorous traceability control that guarantees UTZ certification (label for sustainable agriculture). With this we contribute to improve the lives of farmers, the quality of cocoa and care for the environment

- **Dots with Fairtrade cocoa**

We support the use of eggs laid by free range chickens that have the Range seal.

- **Sustainable palm oil**

Our range of Dots has all the requirements demanded by RSOI certification, thus guaranteeing the use of sustainable palm oil.

- **Reduction in sugar**

According to AECOSAN, our muffins and croissants have 30% less sugars than the industry average. As part of this commitment, we are members of the Sweetfood Project, promoted by the European Regional Development Fund (ERDF), to reduce the amount of refined sugar in the formulation of food and beverages, through the use of new sweeteners of natural origin.
