

AMERICAN STYLE PRODUCTS

IS ALWAYS A GOOD IDEA

Our whole Dots and Ball Dots family is made with:

No preservatives: A preservative is a food additive that slows down the rate of deterioration caused by the presence of microorganisms.

No artificial colours: We make our products without using artificial colours. No hydrogenated fats. We were pioneers in eliminating partially-hydrogenated fats from our production processes.

No added Trans fats: Trans fats are derived from a process of oil hydrogenation, whose purpose is to make food more stable and longer-lasting. The disadvantage is that continuous consumption of this type of fat is related to increased cholesterol levels, thus increasing the risk of cardiovascular diseases.

Sustainable Palm Oil: we have been awarded the RSPO Mass Balance (MB) Certification. All of our products in the Dots range are produced using Certified Sustainable Palm Oil (CSPO) and Palm Kernel Oil (CSPKO).
