

## What is Vegan?

Vegan is a way of understanding life that goes far beyond mere food, configuring itself as a philosophy that is driven by respect for animals and their opposition. Every item excludes meat, eggs, dairy products and all other animal derived ingredients.

## How Europastry applies Vegan?

In the constant search for trend innovation and sustainability, Europastry is one of the main companies whose objective is to launch a wide range of products with these characteristics, deciding a large part of its resources to the research, development and production of this wide selection of bread and pastries.

The US plant-based meat market size is expected to reach values of around \$3 billion by 2024.

26% of millennials are already vegan/vegetarian and 39% of Americans would like to add more to their diets.

31% of consumers would eat out more if healthier options were more readily available.
